Sam

Good to know about the assistance from WV RWA.

What more can you tell me about the units? Capability?

Is the idea to take water from distribution system, treat and bottle for consumers?

Is this free or for a small fee?

Good morning:

Just wanted to let you know that W. VA Rural Water is on the job and working with systems

impacted by the chemical spill. We have arranged a donation from WaterStep. They are transporting a portable treatment unit to WVA Rural Water with 15,000 containers to provide drinking water as the contamination is contained and systems returned to normal.

Thanks Sam
